KUMHO PETROCHEMICAL

| Product Description |

KUMHO KTR is a family of styrenic thermoplastic elastomers manufactured by the Korea Kumho Petrochemical Co.,Ltd.

KUMHO KTR grades are linear or radial block copolymers synthesized with butadiene and styrene monomer in organic solvent. They have good tensile strength, Elasticity and processability without chemical cross-linking such as vulcanization.

| Product Application |

KUMHO KTR grades are used in various industrial applications sectors such as footwears general compounds bitumen modification adhesives and plastics modification.

| Characteristics |

FIELDS	CHARACTERISTICS
Adhesives - Hot melt adhesive - Pressure sensitive adhesive	<ul style="list-style-type: none"> • Low temperature property and bending property • Excellent transparency • Can be dissolved in the variety of solvents
Bitumen modifier - Roofing sheet - Road paving - Sound insulation materials	<ul style="list-style-type: none"> • Increase softening point of asphalt • Reduce the sensitivity to temperature change • Improve service temperature/adhesive strength • Possess low temperature flexibility • Excellent elasticity and impact resistance property • Extend life time of asphalt pavement
Plastics modifier - TV, PC housing - Toys - Mechanical goods	<ul style="list-style-type: none"> • Increase elasticity and impact property • Improve abrasion resistance • Easy colorability • Can be reprocessed
Footwear - Shoe soles - Shoe materials	<ul style="list-style-type: none"> • Increase elasticity • Easy colorability • Excellent low temperature flexibility • Improve abrasion resistance property • Low sensitivity of hardness to temperature

| Handling Precaution |

The direct expose to sunlight and heat and humidity may cause discoloration or quality deterioration.

Keep the product away from direct sunlight, humidity and chemicals and store in a cool, dry place at temperatures below 35°C.
